PROFESSIONAL SUMMARY

Results-driven Software Developer with hands-on experience building full-stack web applications across the modern JavaScript and .NET ecosystems. Proficient in React.js, Next.js, Node.js, Nest.js, and ASP.NET Core, with practical exposure to containerized, scalable deployments using Docker and Kubernetes. Skilled at designing RESTful APIs, debugging software and hardware issues, and collaborating in Agile teams. Currently delivering remote development for an international engineering team.

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Redux

Backend: Node.js, Express.js, Nest.js, ASP.NET Core (.NET), RESTful API design, JWT Authentication

Databases: MongoDB (Mongoose), PostgreSQL, SQL Server, Entity Framework

DevOps & Cloud: Docker, Kubernetes, CI/CD pipelines, Git, GitHub Actions, AWS Azure

IT Support & Networking: Hardware/software troubleshooting, TCP/IP, DNS, DHCP, printer/network/device support, end-user helpdesk support

Tools & Practices: Git, GitHub, Postman, MVC Architecture, Agile/Scrum, VS Code, Unit Testing

WORK EXPERIENCE

Software Developer | Altren Group (Remote) *Aug 2026 – Present*

- Develop and maintain full-stack web applications using Next.js, Nest.js, and Node.js for an international, fully remote engineering team.
- Build and integrate RESTful APIs and reusable backend services, improving performance and scalability of production features.
- Containerize applications with Docker and support deployment workflows on Kubernetes for reliable, scalable delivery.
- Collaborate across time zones using Git-based workflows, contributing to code reviews, sprint planning, and Agile ceremonies.

Software Developer | Portpro *Dec 2025 – Jul 2026*

- Contributed to end-to-end web application development using React.js and Node.js within a professional Agile team.
- Developed and integrated RESTful backend APIs, improving data flow and reliability between frontend and server layers.
- Collaborated with senior developers using Git version control, participating in code reviews and sprint planning.
- Gained hands-on experience with real-world engineering workflows, debugging, and testing best practices.

Graduate Teaching Assistant | Itahari International College *Jun 2025 – Dec 2025*

- Mentored undergraduate students in network operating system fundamentals and hands-on lab exercises.
- Evaluated student assignments and projects, providing constructive technical feedback to improve outcomes.
- Strengthened communication, leadership, and problem-solving skills through direct student support and troubleshooting sessions.

PROJECTS

Community Fix (Final Year Project) — *React.js, Node.js, MongoDB, REST API*

- Built a full-stack civic-tech platform enabling residents to report and track local community issues in real time.
- Implemented user authentication, issue submission forms, status tracking, and an admin dashboard.
- Designed a responsive React.js UI backed by a RESTful Node.js and MongoDB API.

Plant Disease Detection System — *Python, Machine Learning, Image Processing*

- Developed a machine learning system to detect plant diseases from leaf images for early agricultural diagnosis.
- Trained classification models on plant disease datasets, achieving reliable accuracy across multiple disease types.
- Designed a user-friendly interface allowing farmers to upload images and receive instant diagnosis results.

EDUCATION

BSc (Hons) Computing | Itahari International College *Graduated 2025*

Relevant modules: Web Development, Software Engineering, Database Systems, Object-Oriented Programming, Networks.

ADDITIONAL STRENGTHS

- Strong analytical and problem-solving skills, with attention to code quality and performance.
- Able to communicate technical concepts clearly to both technical and non-technical audiences.
- Quick learner with a growth mindset, consistently self-studying emerging technologies and frameworks.
